. Although we should not be oversensitive re Donovan's website - his position re Shell is well known, and he would not be regarded as a credible neutral commentator - but he clearly will use anything he can to damage Shell.

Regards

Dear

It is worth noting the additional traffic that the Alfred Donovan website (<http://royaldutchshellplc.com>) is currently receiving.

I notice that the site has already obtained a copy of the note to staff that sent out to staff on Friday:

<http://royaldutchshellplc.com/>

The message board is also receiving a lot of traffic and comments (some of which seem to be made by internal sources).

Observation: the site is attracting more visitors and users (some obviously Shell staff/contractors with access to the Shell system) seem more willing to share information.

Regards
