Greetings and gentlemen -

Our experience with the Donovans on a number of topics (most recently Sakhalin and North Sea safety) is that any correspondence or actions on our part merely spur them to further questions/statements/actions which they then publicise on their website.

Best is to continue to keep a watching brief (indeed thanks to for spotting this) but not to respond - if you really feel you need to do so, please check first via who keeps an overview of the Donovans activities.

Please also keep us in touch with developments in the case, as these will inevitably be publicised on the Donovans' website.

Thanks and best regards
